

TEKNOFEST

AEROSPACE AND TECHNOLOGY FESTIVAL

ROBOTAXI-FULL SCALE AUTONOMOUS VEHICLE COMPETITION

(UNIQUE VEHICLE CATEGORY)

PRELIMINARY DESIGN AND SIMULATION REPORT

APPLICATION ID: 468176

TEAM NAME: TUNSA Space Robotics

VEHICLE NAME: TUNSA's Martian Settler Robotaxi (TUNMSR)

TEAM CAPTAIN: ELYES KHECHINE

CONTENTS

I.	Summary	6
A.	TUNMSR's Mission	6
B.	Vehicle Design Process	6
C.	Vehicle Unique Aspects	6
D.	Vehicle Software Architecture	6
E.	Vehicle Performance	6
F.	Acquired Skills	6
II.	Team Organization	6
A.	Team Introduction	6
B.	Team Ambitions	6
C.	Team Members	6
D.	Task Partitioning	6
E.	Task Dependencies	6
F.	Project Preliminary Timeline	6
III.	Vehicle Features	6
A.	Vehicle Body & Design	6
1.	Design Inspiration	6
2.	Vehicle Dimensions	6
3.	Vehicle Model	6
B.	Manual Vehicle Control	6
1.	Steer-by-wire Design	6
2.	Pedal-by-wire Design	6
3.	Brake-by-wire Design	6
C.	Vehicle Drivetrain	6
D.	Vehicle Batteries	6
E.	Automotive User Interfaces	6
1.	Manual Driving Controls	6
2.	Autonomous Driving Controls	6

3. Infotainment	6
F. Vehicle Wiring Harness	6
IV. Originality.....	7
V. Sensors.....	7
A. Localization Sensors	7
1. Localization Requirements for TUNMSR	7
2. Inertial Measurement Unit (IMU).....	7
3. GNSS Module	7
B. Visual Perception Sensors	7
1. Perception Requirements for TUNMSR	7
2. Computer Vision (CV) Sensor: Options Assessment	7
3. Preliminary CV Sensor Choice: Stereo Camera	7
4. Time-of-flight Sensors	7
C. Powertrain Sensors	7
1. Powertrain Requirements for TUNMSR.....	7
2. Electronic Battery Sensor.....	7
3. Temperature Sensor.....	7
4. Transmission Sensor	7
5. Wheel-speed Sensor	7
D. Breakdown of Sensors	7
E. Sensor Wiring	7
F. Sensor Mounting	7
G. Sensor Autonomy Coverage	7
H. Sensor Fusion.....	7
1. Sensor Synchronization.....	7
2. Sensor Raw Data Processing.....	7
3. Sensor Fusion Algorithm	7
VI. Vehicle Control Unit	7
A. High-level Control Unit	7
1. VCU Selection Criteria for TUNMSR.....	7
2. Options Assessment	7
3. Preliminary VCU Choice: NVIDIA DRIVE AGX Pegasus Developer Kit	8
B. Low-level Control Unit.....	8
1. Longitudinal Actuation	8
2. Lateral Actuation.....	8
C. Wireless Control Unit	8
1. Wireless Controller	8

2.	Wireless Communication System	8
VII.	Autonomous Driving Algorithms	8
A.	Vehicle Kinematics & Dynamics Modeling	8
B.	Vehicle 2D Control.....	8
1.	Longitudinal PID Control.....	8
2.	Lateral Model-Predictive Control (MPC)	8
C.	Visual Perception	8
1.	Computer Vision Toolbox.....	8
2.	Stereo Camera Data Processing	8
3.	Semantic Lane Estimation & Tracking	8
4.	Visual Servoing & Trajectory Drawing	8
5.	Object Detection.....	8
D.	Motion Planning	8
1.	Global Path Planner.....	8
2.	Behavioral Planner	9
3.	Local Re-Planner.....	9
4.	Velocity Planner.....	9
E.	State Estimation and Real-time Localization	9
1.	Options Assessment	9
2.	Implementation of the UKF	9
VIII.	Security Precautions	9
A.	Security Hardware.....	9
1.	Signal Lights	9
2.	Stop Lamps.....	9
B.	Battery Management System (BMS).....	9
1.	Voltage Monitoring	9
2.	Current Monitoring	9
3.	Temperature Monitoring	9
4.	State of Charge (SOC).....	9
5.	State of Health (SOH).....	9
6.	Balancing System.....	9
C.	Electrical Safety.....	9
1.	Ingress Protection (IP).....	10
2.	Low Current Emergency Disconnect Switch.....	10
3.	High Current Emergency Disconnect Switch	10
4.	Emergency Stop Button (Circuit Breaker).....	10
5.	Overcurrent Breakers	10

6.	Remote Emergency Response System (RERS)	10
D.	Software Security.....	10
IX.	Simulation.....	10
A.	Simulation Environment	10
B.	Map Creation	10
C.	Implemented Algorithms	10
D.	Vehicle Mission	10
E.	Simulation Results	10
X.	References	10

I. Summary

- A. TUNMSR's Mission**
- B. Vehicle Design Process**
- C. Vehicle Unique Aspects**
- D. Vehicle Software Architecture**
- E. Vehicle Performance**
- F. Acquired Skills**

Elyes

II. Team Organization

- A. Team Introduction**
- B. Team Ambitions**
- C. Team Members**
- D. Task Partitioning**
- E. Task Dependencies**
- F. Project Preliminary Timeline**

III. Vehicle Features

A. Vehicle Body & Design

- 1. Design Inspiration**
- 2. Vehicle Dimensions**
- 3. Vehicle Model**

Amin
Wael
Mohamed Yassine

B. Manual Vehicle Control

- 1. Steer-by-wire Design**
- 2. Pedal-by-wire Design**
- 3. Brake-by-wire Design**

Hamza
Hadil
Nesrin

C. Vehicle Drivetrain

D. Vehicle Batteries

Hadil

E. Automotive User Interfaces

- 1. Manual Driving Controls**
- 2. Autonomous Driving Controls**
- 3. Infotainment**

F. Vehicle Wiring Harness

IV. Originality

V. Sensors

A. Localization Sensors

1. Localization Requirements for TUNMSR
2. Inertial Measurement Unit (IMU)
3. GNSS Module

Elyes

B. Visual Perception Sensors

1. Perception Requirements for TUNMSR
2. Computer Vision (CV) Sensor: Options Assessment
 - i. LiDAR
 - ii. 3D Flash LiDAR
 - iii. 4D/3D Imaging Radars
 - iv. Pseudo-LiDARs: Stereo Cameras
 - v. Breakdown Comparison
3. Preliminary CV Sensor Choice: Stereo Camera
4. Time-of-flight Sensors

Ameni
Elyes
Afef

C. Powertrain Sensors

1. Powertrain Requirements for TUNMSR
2. Electronic Battery Sensor
3. Temperature Sensor
4. Transmission Sensor
5. Wheel-speed Sensor

Hamza

D. Breakdown of Sensors

E. Sensor Mounting

F. Sensor Autonomy Coverage

G. Sensor Wiring

H. Sensor Fusion

1. Sensor Synchronization
2. Sensor Raw Data Processing
3. Sensor Fusion Algorithm

Afef

VI. Vehicle Control Unit

A. High-level Control Unit

1. VCU Selection Criteria for TUNMSR
2. Options Assessment

Oussama
Nesrin
Hadil

3. Preliminary VCU Choice: NVIDIA DRIVE AGX Pegasus Developer Kit

B. Low-level Control Unit

1. Longitudinal Actuation
2. Lateral Actuation

C. Wireless Control Unit

Oussama

1. Wireless Controller
 - i. Requirements
 - ii. Selection
2. Wireless Communication System
 - i. Wireless Communication Protocols
 - ii. Wireless Control Software

VII. Autonomous Driving Algorithms

A. Vehicle Kinematics & Dynamics Modeling

B. Vehicle 2D Control

Fatma

1. Longitudinal PID Control
2. Lateral Model-Predictive Control (MPC)

C. Visual Perception

1. Computer Vision Toolbox
 - i. CNNs
 - ii. TensorFlow
 - iii. Object Detection with YOLOR
2. Stereo Camera Data Processing
3. Semantic Lane Estimation & Tracking
4. Visual Servoing & Trajectory Drawing
 - i. Visual Servoing Approach
 - ii. Coordinate Transformations
 - iii. Drawing Planned Trajectory
5. Object Detection
 - i. Traffic Sign Detection
 - ii. Traffic Light Detection
 - iii. Obstacle Avoidance

Oussama
Ameni

D. Motion Planning

1. Global Path Planner
 - i. Options Assessment
 - Hybrid A*
 - Rapidly-exploring Random Tree (RRT)
 - RRT-A*
 - ABIT*

Elyes

- i. Implementation*
- 2. Behavioral Planner**
 - i. Options Assessment*
 - Finite State Machines (FSMs)
 - Extended Finite State Machines (EFSMs)
 - Hierarchical Finite State Machines (HFSMs): Harel Approach
 - Behavior Trees (BTs)
 - ii. Implementation*
- 3. Local Re-Planner**
 - i. Options Assessment*
 - CBB-RRT*
 - Lattice-based Path Planner
 - Optimal Control Improvement
 - ii. Implementation*
- 4. Velocity Planner**
 - i. Options Assessment*
 - Trapezoidal Profile Generation
 - Position Quintic Polynomial for Trajectory Generation
 - Speed Quartic Polynomial Trajectory Generation
 - Symmetric Polynomial Trajectory Generation
 - ii. Implementation*

Elyes

E. State Estimation and Real-time Localization

- 1. Options Assessment**
 - i. Extended Kalman Filter (EKF)*
 - ii. Error-State Extended Kalman Filter (ES-EKF)*
 - iii. Unscented Kalman Filter (UKF)*
- 2. Implementation of the UKF**

Afef

VIII. Security Precautions

A. Security Hardware

- 1. Signal Lights**
- 2. Stop Lamps**

Elyes

B. Battery Management System (BMS)

- 1. Voltage Monitoring**
- 2. Current Monitoring**
- 3. Temperature Monitoring**
- 4. State of Charge (SOC)**
- 5. State of Health (SOH)**
- 6. Balancing System**

Hadil

C. Electrical Safety

1. Ingress Protection (IP)
2. Low Current Emergency Disconnect Switch
3. High Current Emergency Disconnect Switch
4. Emergency Stop Button (Circuit Breaker)
5. Overcurrent Breakers
6. Remote Emergency Response System (RERS)

Ameni
Elyes

D. Software Security

IX. Simulation

A. Simulation Environment

Fadhel

B. Map Creation

C. Implemented Algorithms

D. Vehicle Mission

E. Simulation Results

Racem
